

PROFESSIONAL SUMMARY

Highly ambitious software engineer specializing in cybersecurity and AI governance. Leveraging CompTIA Security+ expertise and a deep focus on secure Large Language Model (LLM) implementation to solve complex technical challenges and protect enterprise environments.

SKILLS

CERTIFICATIONS

CompTIA Security+ ce Certification (Valid until: Jan 29, 2029)

- AI Security, LLM Implementation, Cybersecurity Governance, Threat Mitigation, SQL, PostgreSQL, C#, React, API, GitHub, JavaScript, HTML, CSS, Windows, Problem Solving.
- Deep interest and knowledge in AI security and governance, including defending against AI-specific threats (e.g., prompt injection, data poisoning) and securely implementing Large Language Models (LLMs) in enterprise environments.

EDUCATION

Salt Lake City Community College - *Associates of Applied Science
in Computer Science & Information Systems.*

- Built several software projects with Java, SQL, C# and Javascript
- Built software to control a clock display using assembly code and an Arduino

EXPERIENCE

IT Lab Aide, Salt Lake City Community College

Department of Information Technology (November 2021 - Present)

- Managing secure network access and troubleshooting system configurations across diverse operating systems to maintain infrastructure integrity.
- Imaged over 300 laptops.
- Maintaining quality of equipment including several hundred computers and dozens of printers to ensure students have the best possible access to their resources.
- Diagnosing and resolving complex network connectivity issues for hardware assets to ensure continuous resource availability for over 50,000 users.
- Experience with HPDM managing thin clients for institutions that serve over 50,000 students.
- Teamwork and Team brainstorming to solve novel problems.
- Set up It Infrastructure for over 100 computers in 3 days..

Software Developer and Educator

Remote (August 2021 - Present)

- Creating payment systems, displaying schedules, authentication, and database management, functions for small businesses utilizing Firebase services to create dynamic progressive web apps that offer online and offline functionality to over 30 employees.

- Helping to update a Udemy course that has been included in udemy business with over 2000 paid students to date. The course teaches students how to use React and firebase to create progressive web apps from start to finish.

Electronics Associate, Walmart

West Valley City, UT (June 2019 - November 2021)

- Consistently achieved high-performance metrics by providing technical product expertise and resolving consumer technology issues.
- Managed inventory with various Technologies
